

Supplier of choice for quality bathrooms

UK-BASED Bathrooms International continues to develop its unique and extensive range of baths, basins, fittings and accessories. Through its network of agents in the Middle East, the company says it has become the supplier of choice of quality bathrooms in the region.

Quality in design, products and after-sales service have, the company says, helped it become a leading supplier in the Gulf, with a number of prestigious projects to its name, including royal palaces, presidential suites and hotels. Dubai's super-luxury Burj Al Arab Hotel was just one successful project for Bathrooms International, it says.

From its base in North London, Bathrooms International says it can draw on as many as 160 ranges of taps and accessories, giving designers and specifiers a choice of high-tech, traditional, classical and contemporary designs. More than 60 standard finishes are available in metal and epoxy colours, as well as numerous special colourways to match stone, fabric and paper finishes, it adds.

The company recently opened a new showroom in London which, as well as carrying an extensive range of baths, basins, fittings and accessories, also includes individual bathroom areas from seven of the UK's leading interior designers: Bill Bennette, Ann Boyd, Nina Campbell, Todhunter Earle, Tessa Kennedy, Mary Fox Linton and Joanna Wood.
