

BATHROOMS INTERNATIONAL

Introducing: Ceralite, a remarkable material, which is created through combining a lightweight cement and polyester resin, sandwiched between two resin skins, used here to craft this washbasin.

Intelligent appeal: The smart Ceralite can be matched to any colour and even a stone look can be created. This material is heat retentive and fully repairable.

Introducing: MySpa from Rangemaster, a diverter system that delivers filtered water directly to your tap through a filter cartridge.

Intelligent appeal: This gadget transforms any kitchen tap into a filtered water dispenser at the flick of a switch, and it fits neatly under your sink.
